

PRODUCT DATA SHEET

VITAL E®-A+D

(300 I.U. vitamin E, 100,000 I.U. vitamin A and 10,000 I.U. Vitamin D3 per ml)
NDC 59007-1041-1

DESCRIPTION

Each ml contains: 300 International Units (I.U.) vitamin E (as d-alpha-tocopherol) 100,000 I.U. vitamin A (as retinyl-palmitate) and 10,000 I.U. vitamin D3 compounded with 18% ethyl alcohol and 1% benzyl alcohol (preservative) in an emulsifiable base.

Supplied in 250 ml multi-dose amber glass vials.

INDICATIONS

VITAL E-A+D is a clear, sterile, non-aqueous solution of vitamins E, A and D. This product is intended as a supplemental source of vitamin E, vitamin A and vitamin D.

Natural tocopherols and carotenoids in feedstuffs can be destroyed through processing, ensiling, and storage. A reduced vitamin E and vitamin A intake can result in marginal deficiencies that may not be visible. Intramuscular or subcutaneous injections offer an efficient and rapid method to increase the status of these critically important vitamins for animals.

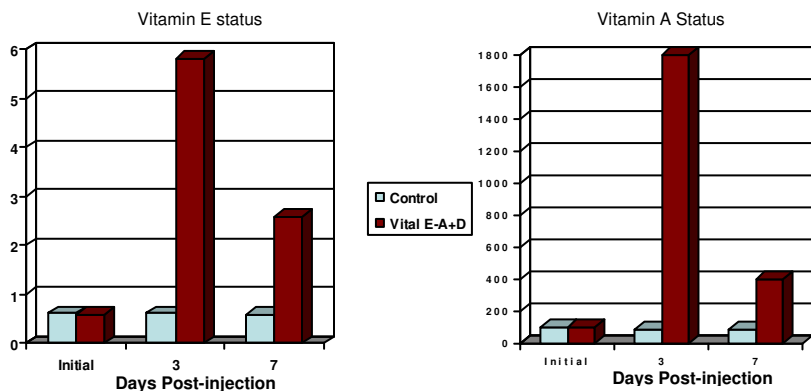

ADMINISTRATION

Intramuscular or Subcutaneous Administration Only. May be repeated as needed.

SUGGESTED DOSAGE

Table with 2 columns: Animal Type and Dosage (mL). Rows include CATTLE (Cows and Heifers, Calves, Yearlings), SHEEP (Ewes, Lambs), and SWINE (Sows and Gilts, Pigs).

Response of Calves to Vital E-A+D

Response of Sows to Vital E-A+D
